Description

EZ Building Block Triangle Combination[®] includes all of the files in EZ Half Square Triangles[®] and EZ Quarter Square Triangles[®].

Each design type has 15 different sizes. Starting at 1" (25.4 mm), the blocks increase in size by ¼" (6.35 mm) all the way to 4½" (114.3 mm).

- Four (4) quarter square triangles are constructed in each single hooping session.
- Four (4) half square triangles are constructed in each single hooping session.
- You can literally create dozens of these units in minutes by copying and pasting multiple units into a larger hoop.
- Blocks can be used alone or combined into traditional blocks with a ¼ (6.35 mm) seam allowance.
- Hundreds of quilt blocks use half square triangles as one of several components in the completed block design.
- Pre-making these quilting block components saves time and makes many complex blocks easy.
- The entire EZ Quilt Blocks group is designed to make piecing complex blocks from 1" (25.4 mm) to 9" (228 mm) a snap. Combine with additional components for larger blocks.
- Quilting Block Components are appropriate for use in quilt blocks, borders, sashing and can be used alone when smaller blocks are desired.
- The size range offered in Quilting Block Components provides a wide range of options for using very small to very large embroidery hoops.

Includes:

- Machine instructions for 15 sizes
- Complete step by step instructions with photos of every step
